SmartMarine - Istanbul [October 2023 - March 2024]

- Developed web applications using ReactJS, Next.js, and Material-UI.
- Integrated APIs to fetch and display dynamic data within web applications.
- Collaborated with team members to design and implement API endpoints for seamless communication between frontend and backend systems.
- Actively managed project repositories on GitHub, utilizing Git version control for codebase management and collaboration.

# HOBBIES

- Coding
- Playing Games
- Listing Music

# PROJECT

## Online Shopping Website | (Smart-Tech)

in this website we can get all Electronic Product Like Smartphone, Laptop, etc.

**Languages Use :-** HTML, CSS JavaScript, MySQL, PHP.

**Tool used:-** Visual Studio [VS Code]

## E-commerce Website| (Royal Fashion)

"I spearheaded the creation of 'Royal Fashion,' an e-commerce platform developed using ReactJS. Employing React's capabilities, I integrated engaging animations, sliders, and a fully responsive design, elevating the site's visual appeal and accessibility across devices. Notably, I implemented a dynamic product filtering system using JavaScript within the 'Our Featured Product' section, allowing seamless categorization based on user preferences. This initiative not only enhanced user experience but also showcased my proficiency in front-end development and user-centric design principles."

**Languages Used :-** HTML, CSS JavaScript, ReactJS.

**Tool used:-** Visual Studio [VS Code]
